Technology Policy

Please note that the SSUNS 2026 technology will vary by committee size and format. As SSUNS will run as a hybrid conference, the policies for GAs, ECOSOCs, Specialized Agencies, and Crisis committees will differ.

Double-Delegate General Assemblies (WHO & CCPCJ)

Technology will be permitted at all times during committee sessions:

- Slack is the primary platform for communication between the Dais and delegates, due to the size of the committees.
- Delegates may use laptops and personal devices both in-room and out-of-room.
- Delegates are expected to arrive fully prepared, with all research completed prior to the conference.
- During moderated caucuses, devices may only be used for note-passing via Slack, and delegates must maintain full attention on the speaker.

ECOSOCS and Specialized Agencies

Committees will operate in a tech-free format, except for online resolution writing:

- Notes must be passed physically; digital note-passing is not permitted.
- Laptops and personal devices must be put away during moderated caucuses, unless specific accommodations have been approved.
- Devices may be used only during unmoderated caucuses for drafting working papers or resolutions.
- Delegates should bring printed copies of their research to avoid reliance on devices during sessions.
- For Specialized Agencies, directives will be written by hand on paper.

Crises

Committees will be conducted entirely on paper.

- Delegates must use paper for all in-committee functions, including:
  - Passing notes to fellow delegates
  - Writing directives
  - Sending crisis notes to the backroom
- Delegates must use 8.5" x 11" notebooks or legal pads to ensure consistency.
- In line with SSUNS' sustainability commitment, notepads will not be provided.

- Delegates are expected to bring two notebooks or legal pads, as committees operate on a two-notepad system.

WIFI

Please note that the wireless password for the Sheraton Wi-Fi is ssuns2025.
- Neither SSUNS nor IRSAM Inc. is responsible for any loss, theft, or damage to personal computers

For any questions regarding the tech policy at SSUNS or technical issues (with respect to committees), please contact committees@ssuns.org
